Outlook for September 22-23 2020:

Typical late September temperatures will continue into midweek, with afternoon humidity readings in the 15-30% range for much of the state, locally lower across southern California. The combination of lower humidity and southwest winds gusting up to 30 mph over the Sierra and mountains of southern California will bring elevated fire weather conditions to those areas each afternoon. Localized spots in southern California could even see critical fire weather conditions develop for a few hours both days. Across far northern California, a few showers will be possible in Del Norte and Humboldt Counties later Wednesday.
